

Alphanimal

Complementary Feed Supplements

Whatever their form (powder, gel or liquid),
our products have been designed to :

- ➔ Ensure that dairy cattle, pigs, poultry, sheep and horses receive the correct amount of vitamins and major minerals, required to achieve **maximum performance**.
- ➔ Accompany animals recovery at the time of their more **current diseases**.
- ➔ **Optimize the health management of animals**.
- ➔ Help the animals **to get over the critical phases** which appear during their farming :
 - Digestion of rations rich in fat - excess feed - change of feeding - optimization of appetite.
 - Kidney problems for the reasons above.
- ➔ **Act on precise points** but which indirectly will guarantee a quality farming :
 - feathering.
 - Thickness of the egg shell.
 - Etc ...

**Usual ingredients associated
with defined plant extracts.**

We have at this day about **130 different formulations**. Some of them combine several of the properties above-mentioned.

We also have formulations adapted to organic agriculture.

Please, find hereunder the complementary feed supplements we have selected in order you can discover what we are able to manufacture in this field.

We can also manufacture our own formulations **under your own brand** (minimum of manufacture required) as we can manufacture your own formulations in total confidence because we use **no subcontracting** : all our products are manufactured in our factory.

Standard presentations :

Liquid or gel form formulations :

Cans of 250, 500 ml.
Containers of 1, 2, 5 litres, 20 litres.

Other presentations available on request : Feeding-bottles of 500 ml.
Containers of 10 litres, 25 litres.
Drums of 200 litres.

Bags of 10, 25 kg.

ALPHANIMAL, this is also formulations for horses, sheep and game birds.
Feel free to ask for these formulations, we will send them to you in return.

ALPHACAL Plus

**Complementary feed
supplement in gel form
for goats and ewes**

Feeding-bottles :

500 ml

Containers :

5 litres

20 litres

Properties :

ALPHACAL+ is an oral formulation based on calcium and magnesium designed for goats and ewes. It can be used directly with the feeding-bottle (presentation in 500 ml).

Nutritional objectives :

ALPHACAL+ is intended to goats and ewes at the time of animals birth to compensate for the deficiencies in magnesium, calcium and to give them all the energy they need.

Composition per litre :

Calcium formiate :	500 000 mg
Monopropylene glycol :	250 000 mg
Gluconate of magnesium :	20 000 mg
Glycerol :	20 000 mg
Magnesium chloride :	3 000 mg
Cobalt chloride :	50 mg

Directions for use :

250 ml / goat or ewe before birth.

250 ml 12 hours after birth.

250 ml 24 hours after birth if needed.

Available colors : pink, orange, yellow, green and white.

BOOSTRUM

Feed supplement
with colostrum

Sachets :
100 g
Oral syringes :
100 ml
60 ml

Characteristics :

BOOSTRUM is a formulation for **lambs and kids** to provide them with immunoglobulines G and therefore, to guarantee the passive immunity transfert just after the birth.

BOOSTRUM is recommended when mother's colostrum has a poor quality, which is the case of most of colostrums (poor concentration in immunoglobulines G).

Composition per sachet of 100 g :

Colostrum guaranteed 1 st milking : (<i>guaranteed free I.B.R.</i>)	35 800 mg
Dextrose :	64 100 mg
Natural sweetener	
Flavour apple, banana	

The incorporated colostrum is guaranteed concentrated with 28% of immunoglobulines G. So, 10 g of immunoglobulines G are guaranteed per sachet.

Composition per syringe of 100 ml :

Colostrum guaranteed 1 st milking : (<i>guaranteed free I.B.R.</i>)	40 000 mg
Monopropylene glycol :	10 000 mg
Vitamin E :	42 mg
Vitamin C :	2 000 mg
Thickener	
Natural sweetener	
Flavour apple, banana	

The incorporated colostrum is guaranteed concentrated with 28% of immunoglobulines G. So, 12 g of immunoglobulines G are guaranteed per syringe.

Directions for use :

➔ See to administrate the soonest as possible after the birth (during the six first hours of life).

Sachet : the half of a sachet (50 g) / head mixed in 700 ml of warm water, milk or milk replacer (40°C).

Syringe : the quarter of a syringe / head (25 ml).

If mother's colostrum is very poor in immunoglobulines G, renew the dosage 6 hours later.

DIETONIC

Rehydratant complementary feed
supplement against digestive
disorders

Sachets 100g
Jars 1 kg
Buckets 2.5 & 5 kg

Properties :

DIETONIC is a formulation designed for **lambs and kids** to stop diarrhoeas and to help at the same time the rehydration. It must be used as soon as the first digestive disorders appear.

Nutritional objectives :

DIETONIC is above all an intestinal transit retarder (action on diarrhoeas) and at the same time a rehydratant (→ stabilization of electrolytes level and water).
It reduces also reactions linked to stress.

Composition par sachet de 100 g :

Dextrose :	30 000 mg	Plant extracts
Bicarbonate :	15 000 mg	Sweeteners
Sodium chloride :	8 000 mg	Fruit flavoured
Magnesium hydroxide :	2 000 mg	Anti-oxidant

Mode d'emploi :

➔ See to give the diluted mixture within 20 minutes after the mixing.

Dilute 20 g or a dosing spoon in 300 ml of warm water morning and evening 2 days running.
Use **DIETONIC** 1 or 2 complementary days according to the evolution of the digestive disorders.

Complementary feed supplements for sheep and goats
