

DELTA SEC Litter conditioner

Animal Welfare is a source of performances

Its superior capacity to absorb liquids ranks it as the most absorbant litter conditioner of the market :

More than 2.5 litres of water are absorbed per kg of product !

Hygiene

Drying of newborn piglets:

- A welfare feeling
- A better umbilical cord healing
- Quicklier colostrum intake.

Its **absorption capacity** allows it to stay longer on duckboards or gratings.

Réduction of mastitis risks and bacterial contamination through the udder.

A drier bedding reduces the bacterial risk.

The warrantee of a longer soft and dry bedding:

- Decrease of bedding deterioration around drinking places and where birds are used to gathering together (near walls for example)
- Better control of beddings temperatures (under 30°C)

PHOSPHORUS FREE

BIODEGRADABLE

EXPECTORANT

MAKES EASIER CLEANING

REPELLENT

REDUCES AMMONIA PRODUCTION

DELTA SEC mixed at the rate of 2 litres in 1 kg of product (result in 1 minute)
